Canada's Big 5 Banks, FY2021–FY2025

BMO | CIBC | RBC | Scotiabank | TD

Fiscal year

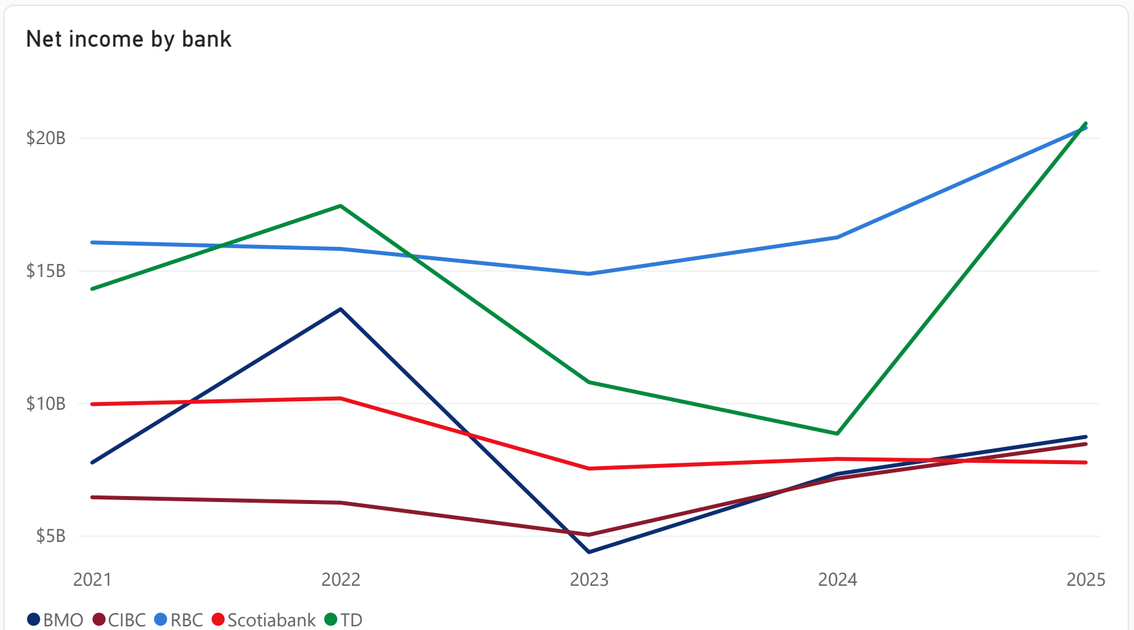

All

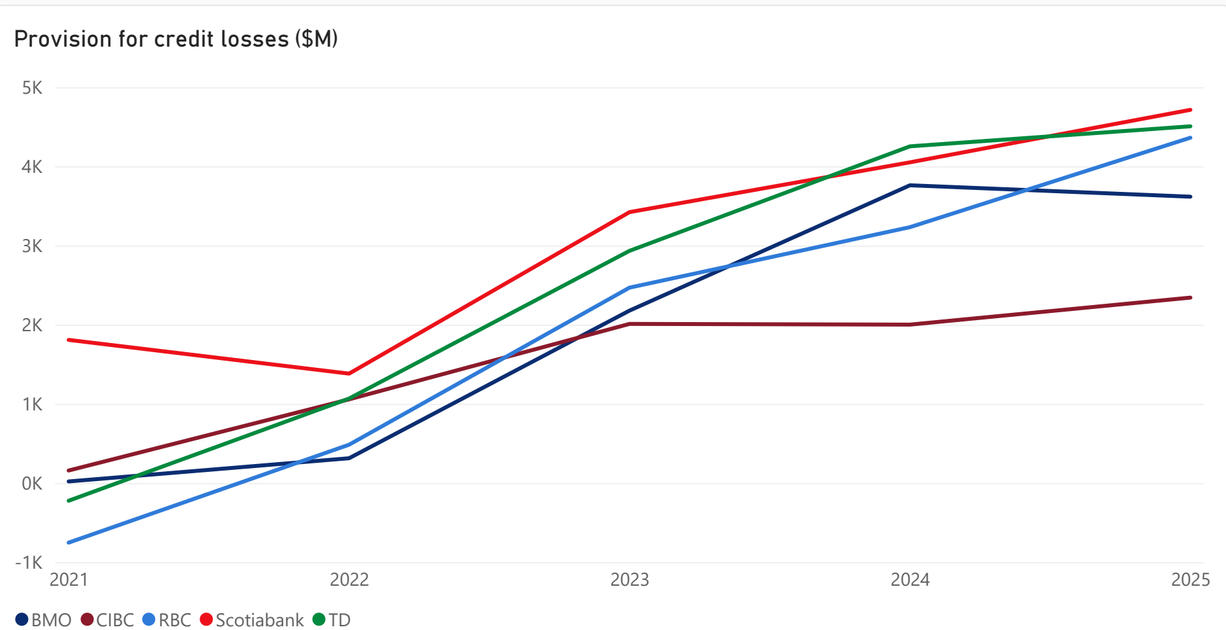

Total Revenue (B)	Total Net Income ...	Avg ROE	Efficiency Ratio
$993.4B	$273.6B	13.7%	56.3%

1.RBC was the most consistent performer

RBC had the highest average return on equity over the five years, at 16.0%, and it never dropped below 14.2% in any year. Its net income grew from $16.1B in 2021 to $20.4B in 2025. Part of that growth came from buying HSBC Canada in 2024.

2. Credit losses rose sharply across the industry

Together, the five banks set aside about $1.0B for bad loans in 2021. By 2025, that number had grown to about $19.5B. 2021 was an unusually low year, and RBC and TD actually released money they had set aside earlier. Since then, higher interest rates have likely made it harder for some borrowers to repay. Scotiabank set aside the most relative to its size, at 12.5% of its revenue in 2025.

Fiscal year

All

Return on equity by year

Bank	2021	2022	2023	2024	2025
BMO	14.9%	22.9%	6.0%	9.7%	10.6%
CIBC	16.1%	14.0%	10.3%	13.4%	14.3%
RBC	18.6%	16.4%	14.2%	14.4%	16.3%
Scotiabank	14.7%	14.8%	10.4%	10.2%	9.7%
TD	15.5%	18.0%	10.1%	8.2%	17.8%

1.TD's 2025 numbers look great, but one year doesn't tell the whole story

In 2025, TD had the best efficiency ratio of the group (49.5%) and the highest ROE (17.8%). But a large one-time gain from selling its Schwab shares boosted those results. Just one year earlier, TD had the lowest ROE of all five banks (8.2%) after setting aside money for its anti-money laundering issues in the U.S.

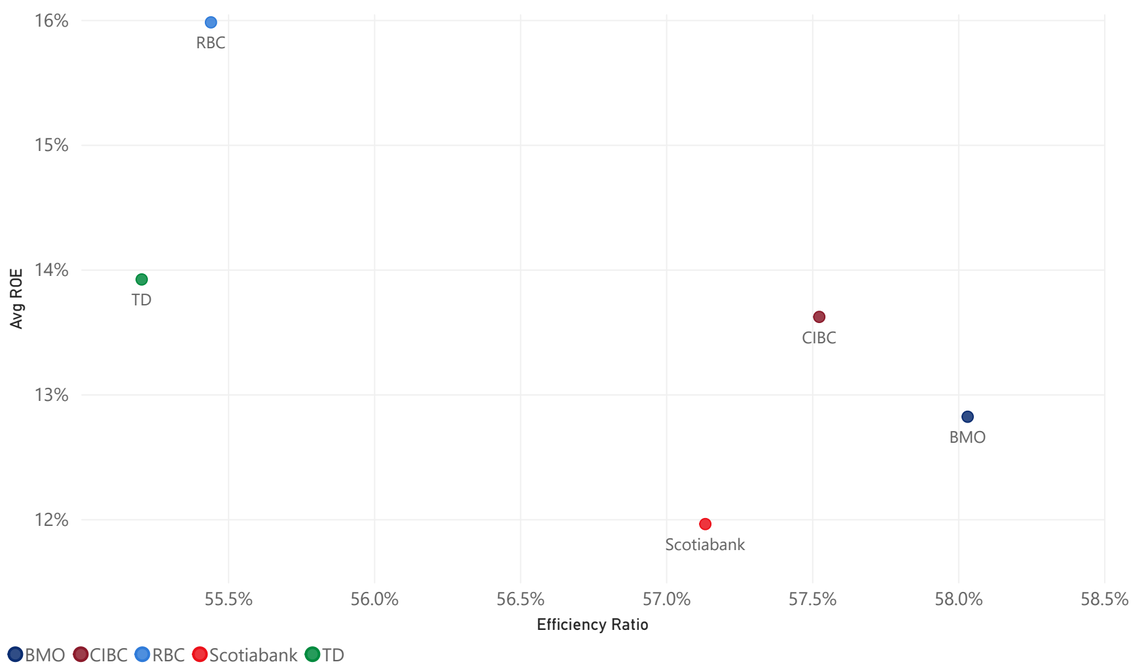

2.Scotiabank fell behind its peers

Scotiabank had the slowest revenue growth of the group, up 20.8% from 2021 to 2025. Its ROE dropped from 14.7% to 9.7%, the lowest of the five in 2025. Its efficiency ratio also got worse, rising from 53.2% to 59.7%, so it now spends more to earn each dollar than any other Big 5 bank.

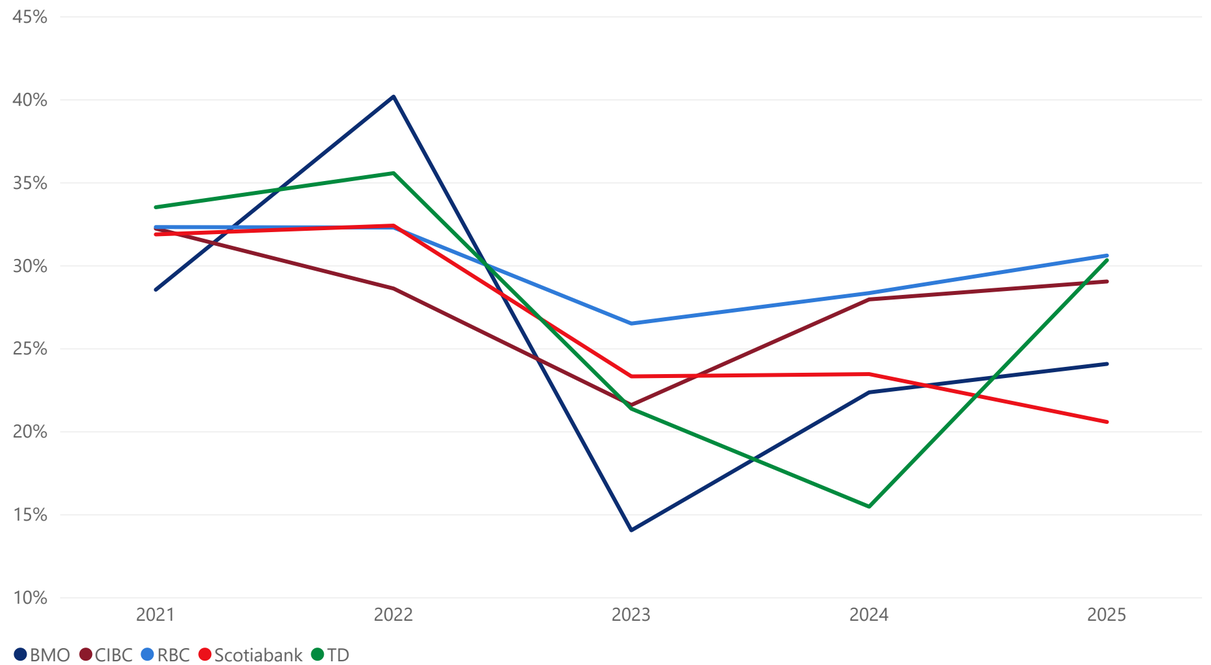

3.BMO's Bank of the West deal made its results swing

BMO's net margin jumped to 40.2% in 2022, then fell to 14.0% in 2023. Its ROE moved the same way, from 22.9% down to 6.0%. That matches the timing of the Bank of the West acquisition: gains tied to the deal in 2022, then acquisition costs in 2023. BMO has recovered since then, but its 2025 ROE of 10.6% is still below where it was in 2021 (14.9%).

Efficiency vs. return on equity

Net margin (net income ÷ revenue)

FY2025 snapshot

Bank	Total Revenue (B)	Total Net Income (B)	Avg ROE	Avg CET1	Revenue Growth YoY	Efficiency Ratio
BMO	$36.3B	$8.7B	10.6%	13.3%	10.6%	58.2%
CIBC	$29.1B	$8.5B	14.3%	13.3%	13.8%	54.4%
RBC	$66.6B	$20.4B	16.3%	13.5%	16.1%	54.9%
Scotiabank	$37.7B	$7.8B	9.7%	13.2%	12.1%	59.7%
TD	$67.8B	$20.5B	17.8%	14.7%	18.4%	49.5%
Total	**$237.5B**	**$65.8B**	**13.7%**	**13.6%**	**14.9%**	**54.6%**

1. Every bank stayed well-capitalized and kept raising dividends

All five banks ended 2025 with CET1 ratios between 13.2% and 14.7%, which is well above what regulators require. Every bank also paid higher dividends in 2025 than in 2021. BMO raised its dividend the most (up 51.9%), and Scotiabank raised it the least (up 20.0%).
